Title: EVO-Charge(*E-Vehicle Booking and Service Management System)*

Project Introduction: This project is developed as a **Minor Project** with the objective of understanding **real-world web application development** and **online booking systems**.

Group Members: Aastha Chaurasiya, Harshita Kumari, Kajal Yadav, Neha Rajput, Tanvi Pal.

BTECH (CSE), Lakshmi Narain College Of Technology Batch 2023-24

LNCT GROUP OF COLLEGES
"WORKING TOWARDS BEING THE BEST"

Project Overview: The **E-Vehicle Booking System** is a web-based application that allows users to **register, login, search, and book electric vehicles online**.
It helps reduce manual booking, saves time, and promotes eco-friendly transportation.

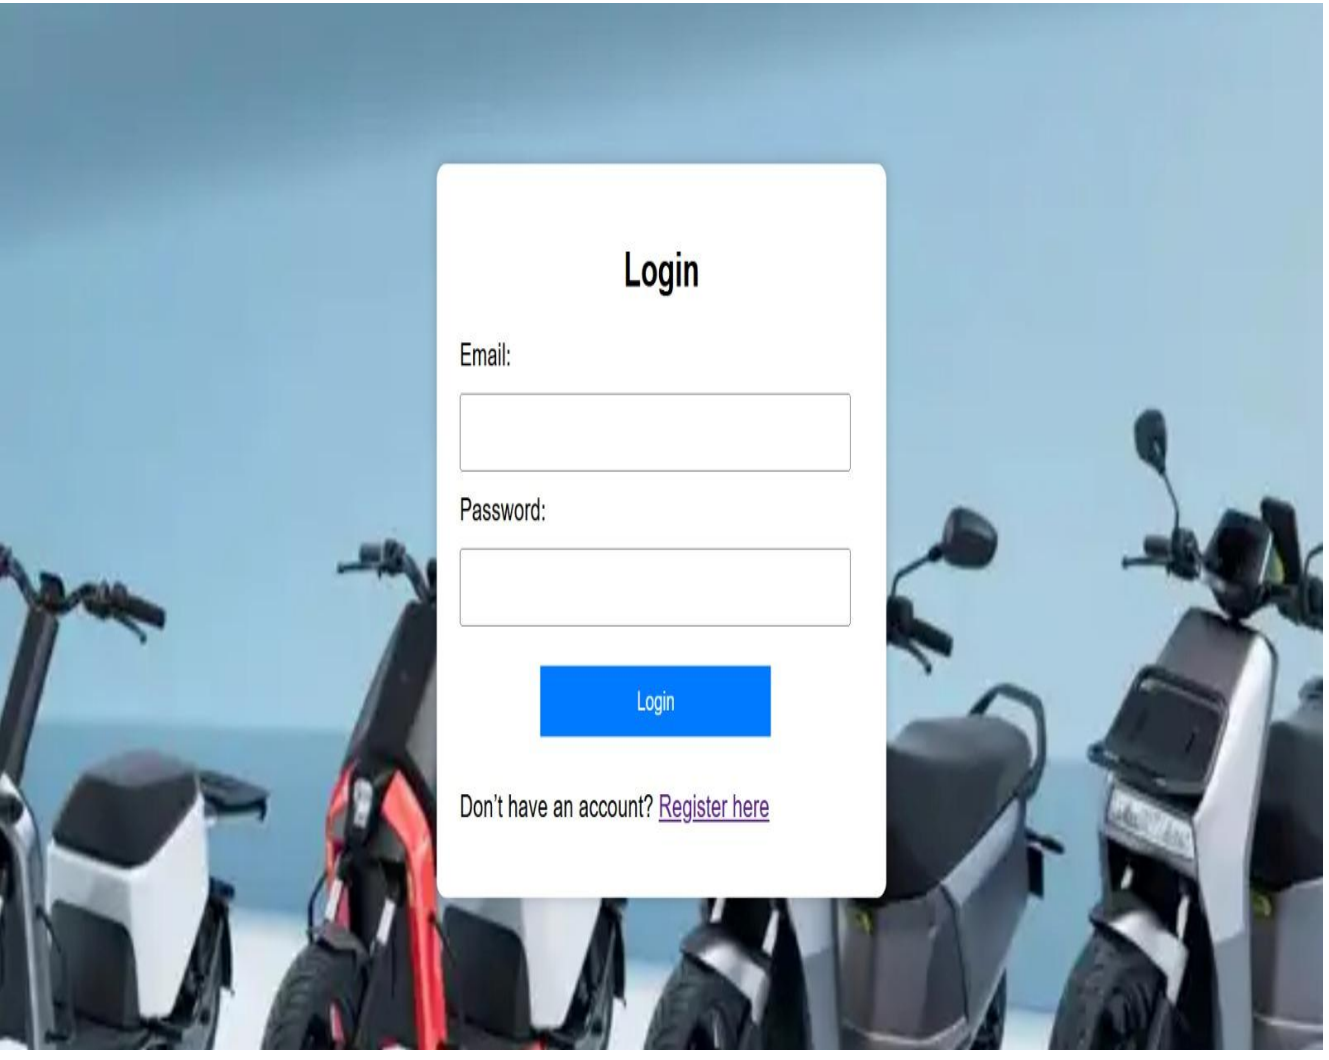
Key Idea:

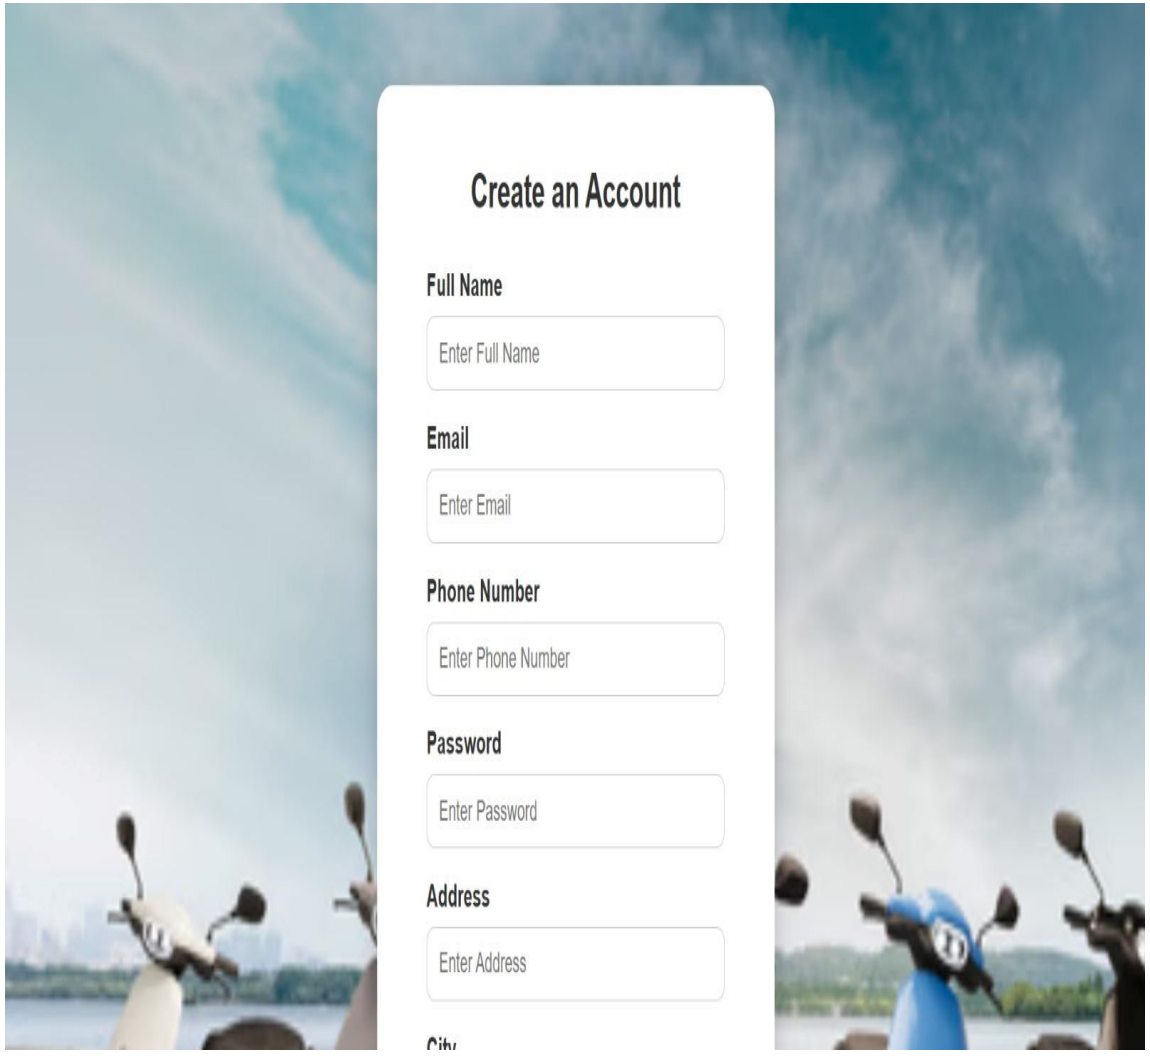
- Online booking of electric vehicles
- User-friendly interface
- Secure authentication system

Users of the System:

- **User (Customer)**
- Login
- Registration
- **Admin**

User Login and Registration page





Main Features:

- User Registration and Login
- Secure Authentication
- View Available E-Vehicles
- Book Electric Vehicle Online
- Booking History for Users
- Admin Dashboard
- Add / Update / Delete Vehicles
- Manage Users and Bookings
- Real-time Booking Status
- Responsive UI using modern frontend

Technologies used:

Frontend Technologies:

- HTML
- CSS
- JavaScript
- Thymeleaf (Template Engine)

Backend Technologies:

- Java
- Spring Boot
- Spring Security

Database:

- MySQL

Use Case Diagram:

```
+--------------------+
|    EVO-Charge      |
+--------------------+

User                        Admin                       Mechanic
 |                          |                           |
 |---- Register             |---- Login                 |-----Update Service
 |---- Login                |---- Add E-Vehicle         |----Records
 |---- View Vehicles        |---- Update E-Vehicle      |---- View History
 |---- Book E-Vehicle       |---- Delete E-Vehicle
 |---- View Booking History |---- View All Bookings
 |---- Cancel Booking       |---- View Users
 |---- Logout               |---- Update Booking Status
```

Admin Dashboard:

Description: The Admin Dashboard is the control panel of the system where the admin can manage all operations.

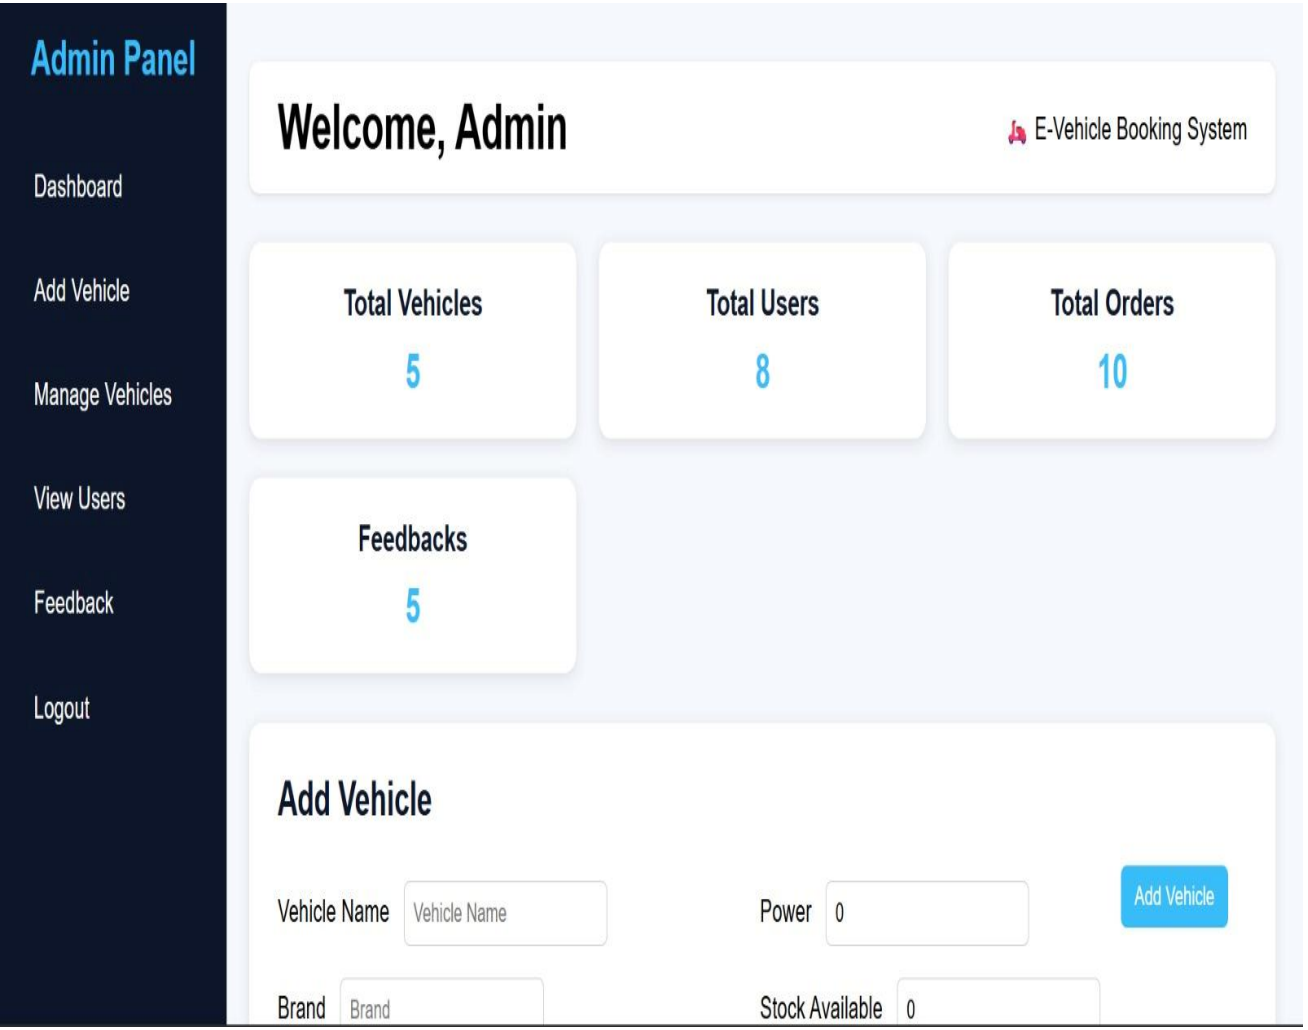
Admin Dashboard Features:

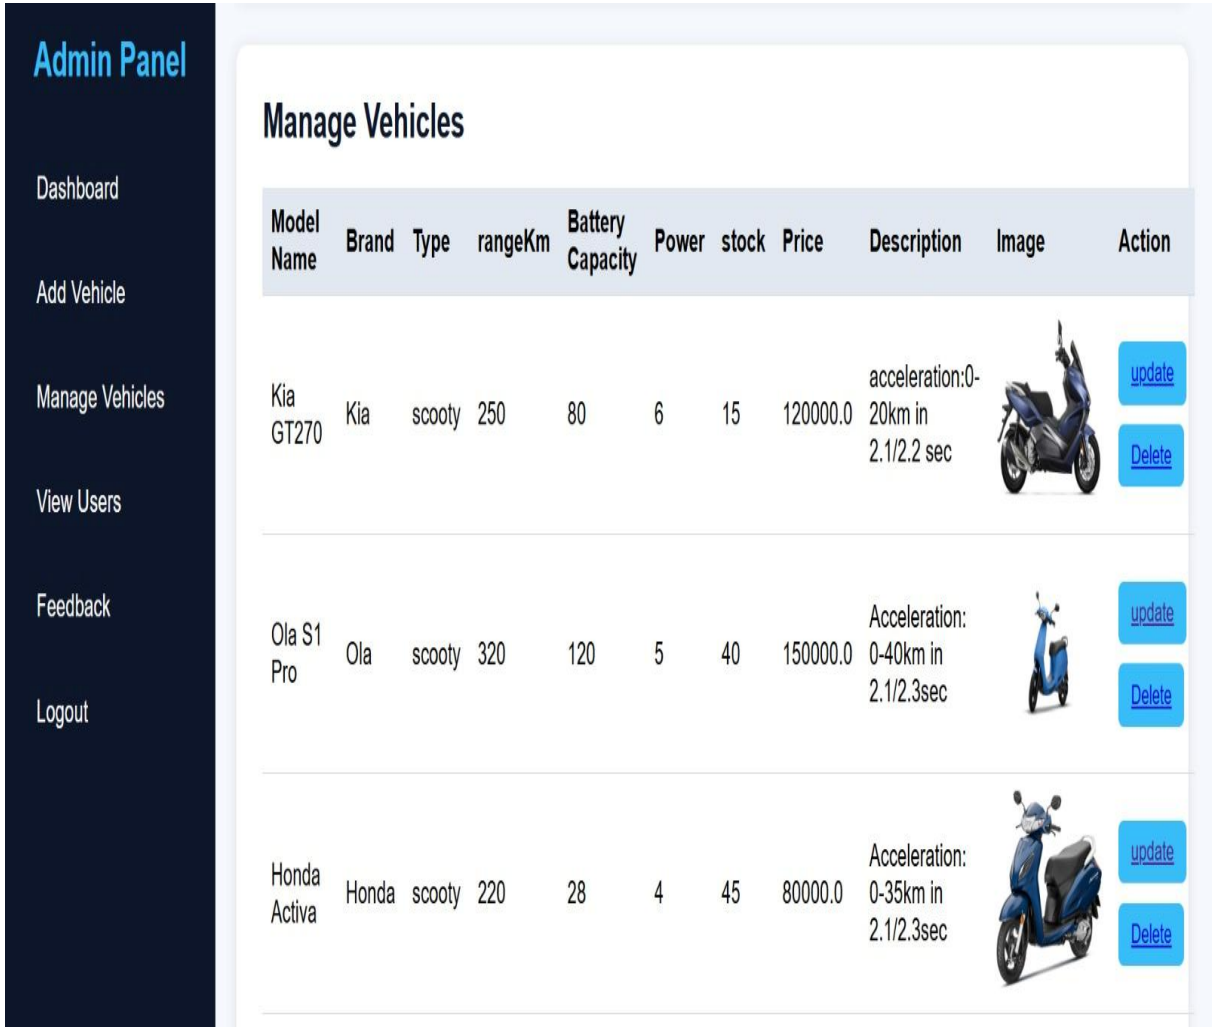
- View total users
- View total bookings
- Add new electric vehicles
- Update vehicle details
- Delete vehicles
- View booking reports

Advantages:

- Easy management
- Centralized control
- Fast decision making

Admin Dashboard





Future Work:

Future Enhancements:

- Online Payment Gateway Integration
- Mobile Application Version
- GPS Tracking of Vehicles
- Rating and Review System
- Email & SMS Notifications
- AI-based Vehicle Recommendation
- Multi-city Support

Thank You!

Thank you for giving us this opportunity. We hope you liked our project.
We are ready to answer your questions
