# Front-End Training

## An Industrial Training Report Submitted To

## Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal

## Towards Partial Fulfilment for the Award of

## Bachelor of Technology
## In
## Computer Science and Engineering

**Submitted By**

## Harshita Kumari(0820CS231047)

**Department of Computer Science and Engineering**
**Lakshmi Narain College of Technology, Bhawarasla, Sanwer Road, Indore**

**Submitted To:**

**Training I/C**
**Mr. Dharni Singh**
**(*Techlene*)**

Mr. Pradeep Pal
**HOD CSE/IT**

**LNCT Indore**

# CERTIFICATE

*This is to certified that Training Report entitled "**Front-End Training**" submitted by **Harshita Kumari (0820CS231047)** is a satisfactory account of the bona fide work done in **'Techlene'** and is recommended for the Industrial Training, carried out in 5th Semester towards the partial fulfillment for the award of the degree **Bachelor of Technology** in **Computer Science and Engineering** to Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (MP.)*

Date: Endorsed By:

Mr. Pradeep Pal
**HOD-CSE/IT**
**LNCT Indore**

**Training I/C**

**Dharni Singh**
**(*Techlene*)**

# TRAINING REPORT APPROVAL SHEET

*The training work entitled **"Front-End Training"** submitted by **Harshita Kumari (0820CS231047)**, is approved for Industrial Training as partial fulfillment for the award of the degree of Bachelor of Technology in Computer Science and Engineering by **Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (M.P.).***

**Internal Examiner** **External Examiner**

# STUDENT DECLARATION

I, ***Harshita Kumari*** hereby declare that the presented report of Internship titled **"Front-End Training"** at **Techlene** is uniquely prepared by me after the completion of three months of work/training at the **Techlene**.

I also confirm that this report is prepared solely for my academic requirements and not for any other purpose. It will not be used in the interest of any third party or corporation.

**Date : 30 October 2025**

Dear **Harshita Kumari**,

On behalf of **Techlene Software Solutions Pvt. Ltd**., I am excited to extend an offer to you for an internship position within our development department. This position is located in Indore, Madhya Pradesh, and is specifically for the role of a **Front-End Developer Intern**.

The internship is scheduled to begin on **November 3rd, 2025**, and will be a **month unpaid internship** ending on **December 17th, 2025**. The schedule for this position is **Monday to Friday**, from **10:00 AM to 5:00 PM**. During this period, you will report directly to **Mr. Arvind Mishra,** who will serve as your Reporting Manager.

As a temporary intern, you will not be eligible for any company-sponsored benefits. We ask that you bring two forms of ID.

During your temporary engagement with Techlene Software Solutions Pvt. Ltd., you may have access to confidential or proprietary business information belonging to the company. By accepting this offer, you acknowledge that this information must remain confidential and agree to refrain from using it for your purposes or disclosing it to anyone outside of Techlene Software Solutions Pvt. Ltd. Upon completion of your internship, you agree to return any company-issued property and documents promptly.

**NOTE:**

- **You will use your Laptop during this period.**
- **Any leaves you take during your internship will result in extension of your internship period accordingly.**

This offer letter represents the full extent of the internship offer and supersedes any prior discussions about the position. Any changes to this agreement must be made in writing. Please review this letter infull and sign and return it via email to the **HR Department** to confirm your acceptance.

We look forward to having you begin your career at Techlene Software Solutions Pvt. Ltd. and wish you a successful and enriching internship.

Welcome to the team!

For : Techlene Software Solutions Pvt. Ltd.

**Dharni Singh**
HR Manager

# Acknowledgment

Every endeavor requires an indomitable urge, perseverance, and proper guidance, especially when it is most needed. Motivated to enhance my skills and knowledge, I embarked on this training program with hope and determination. The journey has been both enlightening and rewarding.

I express my heartfelt gratitude to my mentors, for their exceptional guidance, invaluable insights, and unwavering support throughout the training program. Their mentorship has been instrumental in shaping my understanding of Front-End Development and applying it to practical scenarios.

Additionally, I would like to thank **Mr. Pradeep Pal (HOD, CSE/IT)** and **Dr. Prakash Bharani (Principal, LNCT Indore)** for their support and for fostering an environment conducive to learning. My gratitude also extends to the teaching and non-teaching staff of the Department of Computer Science and Engineering/Information Technology for their assistance throughout this training period.

I am deeply indebted to **Shri. Suprabhat Chauksey (M.D, LNCT Indore)** for providing the facilities and infrastructure necessary to successfully complete this training.

Lastly, I express my profound gratitude to my parents and my entire family for their constant encouragement and support. Without their dedication, this training would not have been possible. I also thank everyone who contributed, directly or indirectly, to the successful completion of this training.

It has been a privilege to learn and grow through this training program, which has added immense value to my academic and professional journey.

***Harshita Kumari***

# Executive Summary

This project presents the design and implementation of a **Personal Expense Tracker Web Application** developed using **frontend web technologies**. The application enables users to record, view, and manage their daily expenses in an organized manner. Unlike traditional manual tracking methods, this system ensures **persistent storage of expense data** using browser-based storage, allowing records to remain available across sessions. The project demonstrates key frontend development concepts such as **DOM manipulation, input validation, modular JavaScript functions, and client-side state management**. With a clean and intuitive graphical user interface, the application improves financial awareness while serving as a practical frontend project suitable for internship training and evaluation.

7. **Comprehensive Introduction**
8. **Technical Background Study**
9. **Extended Requirement Analysis**
10. **Modular System Design**
11. **Technical Implementation Details**
12. **Rigorous Testing Protocol**
13. **Analysis of Results**
14. **Conclusion & Future Roadmap**

---

# Introduction

The **Personal Expense Tracker Web Application** represents a transition from static web pages to **interactive, data-driven frontend applications**. Managing personal expenses manually can be inefficient and error-prone. This project uses **HTML, CSS, and JavaScript** to provide a simple yet effective solution for tracking daily expenses.

The system focuses on **client-side data persistence**, ensuring that expense records are retained even after page reloads or browser restarts.

# Background Study

Expense tracking has traditionally been done using notebooks or spreadsheets. However, these methods lack automation and accessibility. Many basic web applications also suffer from **loss of data on page refresh**.

To overcome this, the project explores **browser Local Storage** as a lightweight persistence mechanism. The study also includes **JavaScript event handling, dynamic UI updates, and formbased input validation**, which are essential for frontend development.

---

# Requirement Analysis

## Hardware Requirements

- Processor: Any modern CPU capable of running a web browser
- Memory (RAM): Minimum 2 GB
- Disk Space: Negligible

## Software Requirements

- Operating System: Windows / Linux / macOS
- Web Browser: Chrome, Firefox, Edge, or Safari
- Technologies: HTML5, CSS3, JavaScript

## Functional Requirements

- Add new expense records
- View all recorded expenses
- Categorize expenses (Food, Travel, Utilities, etc.)
- Delete expense entries
- Persist expense data using Local Storage

---

# System Design

The application follows a **modular frontend architecture**:

1. **User Interface Layer** ○ Expense input form and expense list
2. **Controller Logic** ○ Handles user actions through JavaScript events
3. **Expense Processing Module** ○ Validates and stores expense data
4. **Persistence Layer** ○ Manages data using browser Local Storage

# Implementation

The project is implemented using standard frontend techniques:

- **Event Handling:** JavaScript event listeners capture user inputs
- **DOM Manipulation:** Expense records displayed dynamically
- **Input Validation:** Prevents invalid or empty expense entries
- **Local Storage API:** Ensures data persistence across sessions

---

# Testing

The application was tested using functional testing methods:

- Add Expense Test: Records added successfully
- Delete Expense Test: Records removed correctly
- Category Test: Expenses displayed under correct categories
- Persistence Test: Data retained after page reload

---

# Result

The project resulted in a **fully functional Personal Expense Tracker**. It demonstrates how frontend technologies can be used to create **practical, user-centric applications** without backend dependency**.**

---

# Conclusion

The **Personal Expense Tracker Web Application** enhanced understanding of **frontend development principles**, including JavaScript logic, client-side storage, and responsive UI design. It serves as a strong project for frontend internship certification.

---

# Future Roadmap

- Monthly expense summary
- Chart-based expense visualization
- Export expense data as CSV
- Improved UI and accessibility
